SUPPLEMENT TO
REPORT M-1

25X1X

Artillery ammunition and a large quantity of German rocket launchers are stored in an ammunition dump, located on both sides of the road to Rosta, two kilometers northwest of Bolnisi Logatec. This area is surrounded by a barbed-wire fence one and one half meters high, and outside the fence there are eight pillboxes equipped with machine guns. The underground tunnels, which were constructed before the war, are reportedly very large. The entrances are concealed by trees. Soldiers of a guard company assigned to this dump are now working on the construction of new tunnels, the size of which cannot be determined because of the nature of the terrain. Some ammunition is now being stored in trenches which are covered with wooden roofs.

State identifications:

1. Pill boxes.
2. Wooden huts which billet one company.
3. Entrances to underground tunnels where ammunition is stored.
